Seamless Fogs

A downloadable asset pack

[Descargar Ahora](#)

Nombra tu propio precio

Here are a handful of seamless fogs to use in your game projects. Made these for myself but figured others could benefit. There are three fogs provided, one at each of the following sizes: 256x256, 512x512, and 1024x1024. Images are .pngs.

Free for commercial use, no credit needed. Also you can use it in any engine. These were made in mind to be used like RPG Maker XP's fog system was, but feel free to be creative and have fun with them!
